Monthly Archive for February, 2010

Translations: Newsletter Feb. 2010

Published by Meena Hwang on February 22, 2010 in opencourseware 0 Comments

El mes pasado anunciamos nuestro nuevo formato de boletín informativo del OCW Consortium. Cada mes estaremos enviando un breve boletín de noticias con los próximos eventos y actualizaciones de los miembros alrededor del mundo, y cuatro veces al año el boletín presentará un tema de interés para la comunidad OCW desarrollado con mayor profundidad. Por favor envíe sus noticias, eventos y sugerencias a newsletter@ocwconsortium.org. Siempre estaremos encantados de saber de ustedes.

Novedades

La comunicación con miembros del OCW Consortium será traducida en diferentes idiomas gracias a los esfuerzos de los voluntarios. Por favor ingrese a www.ocwconsortium.org y acceda a su cuenta para seleccionar el idioma de su preferencia. Si usted quisiera formar parte del equipo de traductores y dispone del tiempo para elaborar traducciones en su idioma, por favor contactemos vía correo electrónico a través de feedback@ocwconsortium.org.

La universidad "University of Cape Town", un nuevo miembro del OCW Consortium, lanzó su sitio web "Open UCT", en un evento de lanzamiento el 12 de febrero. La universidad "University of Cape Town" es una de las principales universidades de Sudáfrica y se ha comprometido a contribuir activamente al OCW Consortium.

上月，我们推出开放课程协会的新闻邮件将采用新的格式。接下来的每个月，我们将继续寄送关于“即行举行的活动”和“信息简报”的新闻邮件，内容来自世界各地的协会成员。另外，一年中我们还将分四次发送深度报道，内容涉及开放课程协会社区相关的话题。如果您有新消息和活动，或是任何建议，请发送电子邮件至：newsletter@ocwconsortium.org

信息简报：

开放课程协会（the OpenCourseWare Consortium）将会以各种语言给协会成员发布消息，这些翻译来自志愿者。请访问网站www.ocwconsortium.org并用您的帐号登录，来设置“语言选项”（“selection of language for communication”一栏）。如果您愿意贡献翻译文档，请发送电子邮件至feedback@ocwconsortium.org。

开放课程协会新成员——开普敦大学（the University of Cape Town），其新网站Open UCT在2月12日正式上线了。南非的几所大学的代表们和开放课程协会的董事会成员以及职员与会，表示对UCT阶段成果的支持。更多信息，请访问网站opencontent.uct.ac.za。

西开普大学（the University of the Western Cape）、开普敦大学（the University of Cape Town）以及开放课程协会（the OpenCourseWare Consortium）共同主办了“南非高等教育中的开放教育资源和开放课程”会议（OER and OCW in South African Higher Education）。会议内容结合了国际形势和南非国情，这些观点来自不同院校、各个组织的成员，其中包括开放课程协会的董事会成员代表。

Proposal: OCW at Dartmouth College

I've been working on this proposal for OpenCourseWare at Dartmouth College to help with my advocacy there. I'm hoping to present it to President Kim after I return to campus in the Spring. I also hope that it will be useful for activists at other schools. It's of course CC licensed. [Click here for a recent version in .doc format](#). There's an unformatted (wiki markup only) copy/paste of the full text after the jump. It's also [up on the freeculture.org wiki](#), if you want to play around with it in wiki format. However, since I may not check the wiki page often, the best way to suggest changes back to me is probably to email me or write in the comments.

"It's a great opportunity for students to become extraordinary engineers."

In 1998 Juan Eduardo Lara's father, an industrial electronics engineer, was selected by MIT to help establish a mechatronics program for Mexican students. "I was very interested in what my dad said about this combination of mechanical engineering and computer engineering," says Lara. "I wanted to know more," says Lara, "and I asked my father to teach me more about engineering."

Juan's father bought him a set of tools from the local Radio Shack® and they set to work building robots, while learning the workings of engineering. "I was very interested in it," says Lara. "I began to study calculus, linear algebra, differential equations, and learned mechanical drawing using AutoCAD®.

Juan's love of engineering developed early thanks to his father, who taught him how to learn and inspired other future engineers through several projects.

Studying across a resource

In March 2005, Lara began searching for a university mechatronics program and stumbled across MIT OpenCourseWare. He spent hours reading and exploring the site, making connections between what he already knew and what he still had to learn. "I found OCW to be a great resource because it gave me the opportunity to get ideas for my projects," says Lara. "It helps me learn more from my courses."

Building on a resource

As a student at the Tecnológico de Monterrey, Campus Monterrey, Lara has joined with others to receive a Ph.D. from Carnegie Mellon University, to create a program for first-year students through the High Performance Engineering Association (HPEA). The HPEA provides students with opportunities to practice what they're learning. The HPEA is working with the University of Monterrey to allow students to develop their projects and ultimately create businesses around them.

Lara says the most fundamental concept of HPEA is built on the MIT philosophy of learning by doing. He passed all of his first-year mathematics courses from OCW, including *Single Variable Calculus*, *Linear Algebra*, *Multivariable Calculus*, and others. "I have found OCW very helpful," says Lara, "and I think it's a great opportunity for students to become extraordinary engineers."

GETTING INVOLVED

Getting (More) Involved with the OCW Consortium

Wondering how to get more involved with the OCW Consortium? You should be! Opportunities for collaboration with other Consortium members around the world are some of the most significant and enduring benefits of membership, and many of those opportunities are within the community of interest sites. If you are interested in getting involved, involvement is really a matter of getting the most out of your organization's members. If your organization is not yet a member of the OCW Consortium, you can still benefit from our work. We have a wide variety of projects representing a wide range of time-lines and participation formats, so finding one to serve your interest and circumstances shouldn't be difficult. If you don't see what you need, we encourage you to contact us and let us know what you're looking for, and we'll do our best to find out what we can to put you in touch with others who are similarly inclined.

Join/Form a Community of Interest

Communities of interest are discussion forums, organized by members and organized according to particular topics of interest within the OCW movement. Participants in a Community of Interest is by invitation only, and is limited to specific members. Some examples include the K-12 Community and CED Health Community. Visit our dedicated Communities of Interest website.

Join/Form a Working Group

Working groups arise from the membership, forming around discrete tasks that call for collaboration, whether that be drafting a document, researching a common question or writing a piece of code. Often a group will gather initially at an OCW Consortium Global Meeting and then follow up via email or telephone. Working groups are typically smaller than Committees, and less formal than Groups as soon as the task is complete. Others maintain ongoing email lists so that participants can be on-call or relevant basis (e.g. moderators). Examples include the Technology Committee, Curriculum Committee and Initiatives Working Group. For a full list of our current active Working Groups, click here.

Join a Committee

Committees are more formal groups that have been tasked by the Board of Directors to provide advice regarding the life of the Consortium. Standing Committees are tasked with ongoing business, such as the Board of Directors, while Ad-Hoc Committees are formed to address specific issues as directed by the Board of Directors. Committees are tasked with specific responsibilities, such as an employee search process or website revision. For a full list of our currently active Committees, click here.

Run for a Position on the Board of Directors

The Board of Directors of the OCW Consortium provides strategic direction to the organization in support of its mission. Membership on the Board of Directors is limited to employees of member organizations. The Board of Directors is responsible for setting the overall direction of the Consortium, and is also responsible for providing leadership at the highest level. Specific Responsibilities for Members of the Board:

- Develop a strategic plan every two years at a high-level guidance for Consortium activities
- Provide input and/or approve an annual business plan that includes activities intended to achieve the organization's goals
- Approve the annual budget and review financial performance
- Set annual dues levels for the Consortium and attend to strategy/membership issues
- Provide input and support to the Executive Director on an as-needed basis and evaluate performance
- Promote communication between the Board and Consortium Committees/Working Groups
- Represent the Consortium at speaking engagements and conferences relevant to Consortium goals
- Proactively develop funding sources for the Consortium

If you are interested in running for a seat on the Board of Directors, please indicate our interest by clicking here.
